1

Introduction

The World Health Organization (WHO) declared COVID-19 a pandemic on 12 Mar 2020, and employers are still addressing the severe implications on working practices and adjusting their employment and benefit policies accordingly. Countries have enacted legislation and provided guidance related to workforce protections, leave and layoff procedures, employment subsidies and changes to existing enforcement procedures. To help multinational employers continue to address worksite, economic and associated travel issues, this roundup provides links to some general information about the COVID-19 outbreak from organizations, government websites, third-party resource pages and news articles. Content is organized in reverse chronological order — with global articles first and then alphabetical by country.

2

COVID-19 information from global and EU organizations and agencies

Global information
